Comments: (If possible, please reference section number and/or page number in document if applicable.)

Home is less than 1/4 mile from RAIL LINE. Concerned
about safety.

Issues not nuclear power, it is nuclear weapons → nuclear
power was developed to support the notion of "weapons for peace" —
Sorry, nuclear energy for peace.

I urge DOE to begin a far more extensive analysis —
no need for rapid decision — we can + should open up
all options — take next 50-100 yrs. to decide.

And I urge a shift of our nuclear weapons budget to
the research of how to dispose not only the waste
from our 103 reactors but from the nuclear
weapon program + the more than 10,000 warheads we
as a nation are stock piling. Security, world wide, means
accepting our mistakes + working together, recognizing our
common interests, to solve all our nuclear waste + weapon problems.

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable the Department will consider comments received after February 9.

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible; then secure with tape.
